

same text, different stored value,
different answer

visible text (unchanged)

After step 5 the
value is 457.

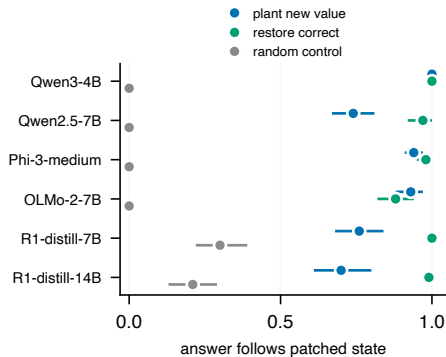

hidden state at that position

457

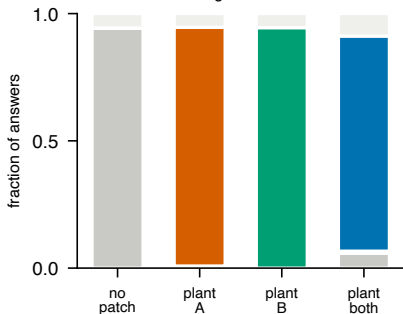

462

continuation computes
from 462, not 457

Qwen2.5-7B: the answer category tracks
which registers were set

Qwen3-4B: the answer category tracks
which registers were set
